Course Objectives

This course is required of all incoming graduate students in psychology. Because we are a diverse department and due to *some* compartmentalization within the programs this course was designed as a venue for

- 1) New students to meet each of the faculty,
- 2) Faculty members to outline their expectations of student performance (e.g, research involvement, timelines for completion of theses and dissertations, general time commitments, etc.), and
- 3) Presentation of faculty research interests.

Assessment

Performance in this course will be evaluated entirely on attendance. As graduate students, it is expected that you will attend **ALL** scheduled meetings for this course (this is an expectation for all courses). However, with that in mind, there are reasonable circumstances (illness, professional conferences, etc.) that will necessarily result in missed classes – class meetings missed for “reasonable circumstances” will not count against your grade.
